### PLEASE NOTE:

CBH/SAA is not responsible for incorrect information printed on ads; are not created by CBHSAA. If changes or corrections must be made they must be made in writing prior to printing. All articles, stories and advertisements are the opinions and statements of the contributors and do not necessarily reflect the editorial opinions of this publication.

HOW TO SEND YOUR AD: Go to **CBHSAA.net** and look for the instructions on the home page. **Advertising with CBHSA** then look for “**Submit Your AD**” button. **The ad deadline is the 25th of the month, with a one month lag.** For example if you want your ad in the June edition, submission would be by April 25th. Expect a confirmation within 5 days. Questions? Call or text 619-368-2948. Send all submissions in a generic format such as **jpg, doc, or pdf**. Note: some fonts may be replaced for legibility. If you send a PDF file, or embedded fonts, please send files less than 1MB in size.

**PAYMENT:** Send payments to CBH/SAA Treasurer - P.O. Box 27248 Anaheim, CA 92809 or submit online payments with ad as described above. Payments must be received prior to the newsletter deadline Check, Credit Card or PayPal - [www.cbhsaa.net/advertising.html](http://www.cbhsaa.net/advertising.html).

**MEMBERSHIP, MISSING MAGAZINES, OR ADDRESS CHANGES:** The post office WILL NOT forward your MAGAZINE. Send your address changes to CBH/SAA - 7710 Camino Vista, Shingletown, CA 96088 or email [mpsevertson@frontiernet.net](mailto:mpsevertson@frontiernet.net). If you are also a member of NFAA, the CBH Secretary will forward the changes to NFAA headquarters.

Well folks May is in the books and I hope this newsletter finds you well. May and June are always busy months in the sport of archery and this year was no exception.

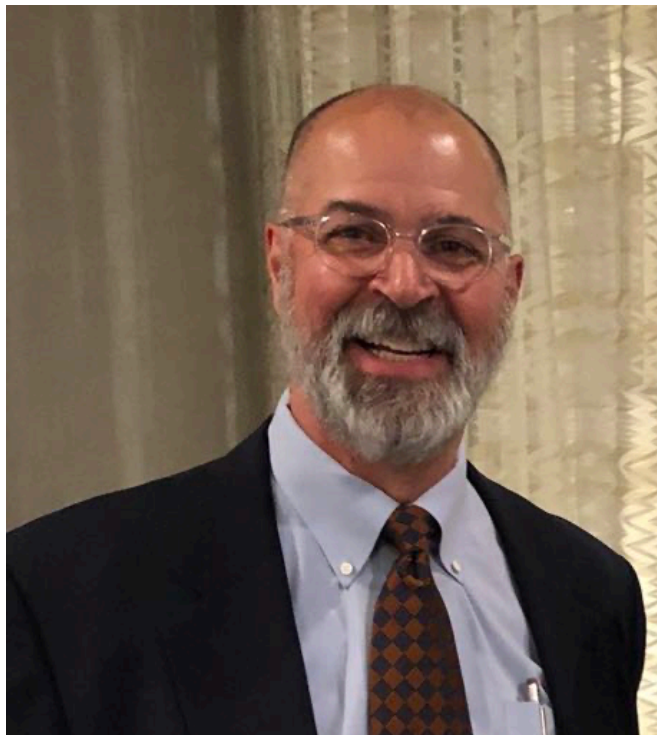

I heard the SAB Western Classic was quite a success if not a little bit wet. The rain this year has been historic in some places and made for a little mud up in Redding. Looks like a great turnout and didn't sound like any major controversy. I shot with some NorCal guys recently and it sounds like the usual few people that stormed off the course because of an arrow call that didn't go their way, but nothing more than that. Congrats to everyone that enjoyed that weekend.

We just finished with the State Broadhead and I can't say enough about the great setup and what a nice job the Lodi Bowmen did to host a great event. Bryan Borrás, Bill Midgely, Victor and the whole group were incredible. It was one of the tougher 3D's I've shot. Judging distance is not for everyone, but when you're good at it the shoot becomes a lot of fun. We couldn't have asked for better weather or a better group. We had the pleasure of giving our lobbyist Bill Gaines a Special Achievement Award on Saturday night and, as always handed out \$10,000 in prize money. Huge thanks to Rodney York for directing the tournament and to Craig Fritz for running the always important \$10K drawing. Please keep in mind that we will be running the shoot at Lodi again next year and look forward to seeing all of you there!

Now for my rant...

No more than 24 hours after the Broadhead awards were handed out the nonsense and rumor-mongering began. A vicious rumor was started on the internet that a transgender person shot in the wrong gender class and won that class using an unfair advantage. This rumor was immediately

debunked by everyone associated with the tournament and everyone that was there. Transgender women participating in women's sports is a hot-button issue right now, and everyone has an opinion. I will not offer mine except to say that the California State Archery championships are governed by NFAA rules except where specifically modified due to particular tackle or distances shot. In this case, the NFAA has clearly handed down their policy that all transgender athletes will participate in the gender class that was assigned to them at birth. That is exactly the way this archer was handled at the State Broadhead.

According to what I have so far, this rumor was started on a website called RokSlide which is some western state DIY hunting platform. Sadly a couple of individuals that enjoy unlimited respect from me and the entire CBH/SAA community fell for this nonsense and popped off on their social media without a shred of fact. Their comments have since been retracted and deleted.

It has also come to my attention that we have at least two individuals that have resigned from their memberships in CBH due to our "lack of respect for women's sports." As you can now see, that is absolutely unfounded criticism. I wish them well in their future archery endeavors.

In closing this rant, I would encourage anyone with a concern about a tournament or policy to first seek all the facts by calling, emailing, or texting me or any other CBH/SAA board member before quitting anything or attempting to besmirch the reputation of this organization and its affiliates with unfounded gossip and rumor from some stupid website. The legislative agenda has been busy so far this year and doesn't appear to be letting up. I know Amanda will have a complete and detailed update from Gaines and associates later in this newsletter. Cont page 6

## Legislative Team Update

by Amanda Duchardt, CBH/SAA Legislative Coordinator

Greetings CBH/SAA friends and family!

I just returned from Lodi Bowmen and the State Broadhead Tournament. I can't say enough good things about this shoot and the hospitality offered by Lodi Bowmen and the Big Game Club. ALL the host club members were very welcoming and excited to see us there for the big event. The course they set up was challenging with a lot of interesting shots/target placement and deceiving yardages that made us think and think some more about yardage. This is a wonderful range, and I am excited to return next year and maybe spend an extra day or two exploring the local antique shops and wineries! Additionally, the State Broadhead Tournament is a wonderful reminder of the hunting privileges that the Legislative team works hard to protect. I want to thank the Big Game Club for honoring our lobbyist Bill Gaines with a lifetime achievement award for all he has accomplished in the defense of our sport and promotion of conservation. Bill is the key to our legislative defense and we would not be effective without his expertise. Congratulations, Bill!

Just a couple quick Legislative Updates to share this month:

- **AB 28 Firearm Excise Tax** – legislation which would impose an additional 11% excise tax on the sale of all firearms, firearm parts, and ammunition sold in California – passed off the Assembly Floor and over to the Senate on May 25. Needing a 2/3rds vote (54 of the 80 Assembly Members) to pass, AB 28 received 57 “aye” votes. Bill Gaines and our CHCC partners worked hard to stop this horrible on the Assembly Floor and we won't stop now that the bill is in the Senate. AB 28 must be heard in the Senate policy committee by July 14th to meet legislative deadline. Stay tuned for legislative alerts on how you can help oppose this bill!
- I am pleased to announce that after several conversations with California Department of Fish and Wildlife (CDFW) and providing public testimony at recent Fish and Game Commission meetings, **CDFW agreed to retract the proposed ban on archery at Los Banos Wildlife Area!** Special thanks to Bill Gaines, Chriss Bowles, J-Barr and Gilbert Olivas for your support and insights, which were instrumental

in helping us convince CDFW that a ban was not necessary and that the bowhunting community can hunt this area responsibly.

- Finally, mark your calendars for the **CBH/SAA State Unmarked 3D Championship Tournament and Legislative Defense Fundraiser** on November 5 at Oranco Bowmen. The weather should be nice and cool and we're planning a BIG raffle to help generate funds for the Legislative Defense Fund. We also hope to have vendors and CHCC partners setting up booths and engaging participants with educational opportunities and cool archery products and services. Hope to see you there!

**Reminder:** Whether you've been involved in archery or hunting your whole life, or are new to this sport, **you have something of value to add to the conversation and I encourage you to reach out to me and the CBH Legislative team and share your knowledge and experience!** We look forward to hearing from you soon!

# FULFILLED DREAMS THANK YOU!

We are so excited to share these photos and information with you all. Your Big Game Club has worked on a concept of “creating” a Mobile Measuring Clinic for roughly a year and a half.

From the conception, donations, contributions of big game animals; to the purchase of “just the right trailer” we arrived at a loading point.

Oranco Bowmen have been more than patient to house these articles while inside trim and completion were done by Craig Fritz and team.

More bowmen came together under the leadership of President Chriss Bowles and with the expertise of Pete Whitworth and more volunteers from *Oranco Bowmen* we now have a trailer ready to roll. Besides traveling the state to offer training for those interested in becoming measurers of our big game animals, the trailer will be used to transport equipment to the Legislative Caucus Shoot held in Sacramento come mid August. We want to acknowledge all who gave, financially, of their expertise and assistance towards our goal - together it has all come to fruition. *California Bowmen/State Archers Association and Big Game Club.*

## Bill Gaines Lifetime Achievement Honored

(Pictured Below with Wife Wanda)

Bill Gaines is a huge asset to the CBH legislative team. We could not adequately defend our interests without Bill, a strong well connected and passionate lobbyist. He keeps us updated and informed on issues affecting conservation, hunting and archery, and is our advocate behind the scenes. Publicly, Bill represents us at the State Legislature and California Fish and Game Commission (FGC) meetings. He is generous in his thanks to the FGC and Department of Fish and Wildlife for their partnerships. He is quick to hold them accountable and lets them know conservation and bowhunting communities won't be pushed around when their proposals and decisions are not based in scientific fact.

Bill has made our community stronger through the formation of the California Hunting and Conservation Coalition (CHCC).

When the archery community is under threat, our CHCC partners and Bill step up and help us provide a unified defense. This model of collaboration within the hunting community is being picked up and implemented by other states.

### CONGRATULATIONS Bill Gaines of Gaines and Associates CBH/SAA Big Game Club's 2023 Life Time Achievement Award Winner

"I only work in the areas of interest I care most deeply about, am personally active in, and extremely well educated in -- wildlife management, conservation, and hunting."  
Bill Gaines, Principal

**President's Message** Continued from page 3-So I will not go into great detail except to say that your gun rights are definitely under assault AB28 has passed the House and is headed to the Senate. As archers, we know many of us are also gun owners and do hunt with firearms. As we archers expect support from the other NGOs in the Hunting and Sportsman's Coalition, we at CBH also support all of our other partners and the gun rights groups are no exception. This bill will be adding mountains of expense to every firearms or ammunition purchase in the state of California and it is my sincere concern that archery equipment may be next. Please take time to read the Leg Team update and write your state legislators every chance you get. Join the Voter Voice! If you see something, say something. Much like voting, it is my opinion that if you don't do it you have little reason to complain. We may not get what we want, but at least you'll feel better knowing you did what you could.

The State Field Championship was June 10th and 11th. This is kind of the Granddaddy of archery tournaments, in my opinion. This is one of the oldest from the NFAA perspective and is always a true grind. It's a lot of arrows and a long walk. There are a lot of rules, and it is a head game at every turn. Our new CBH 2nd VP of Field, Robert Tehee, has done a great job pulling it together. Robert has a self-professed passion for Field Archery which makes him kind of a masochist in my book, but he is still a wonderful guy and a true leader.

The Mid-Year Presidents meeting is the first weekend of July. The team will be headed to Visalia for this important conference to discuss this year's NFAA petitions and discuss and act on other outstanding business. We will be having a bylaws committee meeting the Friday before and discussing any additional bylaws cleanup that needs to be done. Your regional Presidents will be reaching out to your clubs for any updates and information, so please let them know where your concerns lie. We are the voice of archery in this state and make it a priority to listen. You may not always get what you want, but it will not be because you were not heard. Please keep in mind that any petitions that you want to introduce to CBH must be reduced to writing and submitted by October 1st in order to be considered at the upcoming State Meeting in New Business.

Lake Isabella Carp tournament will be over by the time you read this. According to J-Barr they have a

lot of water up there and conditions should good. Sadly, I missed it myself, but I encourage everyone to jump out and go fish a Carp or Tilapia and attend the tournaments each year. These things are a lot of fun and a great way to kill an afternoon outside (no pun intended). The equipment is very basic and not really expensive. Small game hunting is a great way to get a kid outdoors. J-Barr, Brad and their team have made a career trying to get young kids into archery hunting and I really applaud them for it. Come on out and support these events!

Hopefully, everyone has a bead on the Big Game tags they will be putting in for. The drawing is June 2nd and will be over by the time you read this. By all estimates the number of registered hunters in California is on a steady decline. Every year we see a drop in license sales. The department has allocated a bunch of additional elk tags this year and the deer and antelope tags have stayed steady. Everyone has a good chance of drawing something. Put in for some tags! It doesn't cost that much so just put in for the draw... and who knows? You might get one!!

Whatever you do, I encourage you to keep pushing the kids outdoors. We are quickly becoming a sedentary society of video gamers and remote workers. We should be doing everything we can put an end to it and get everyone OUTSIDE! All that being said, see your local hunter education instructor if you need a certificate, then go grab your gear and hit the road!! As my old friend Corky Simmons of Simmons Gun Repair used to say..." Take your Kid Hunting instead of Hunting Your Kid" Good luck to everyone for whatever state you attempt to draw.

I promise I'm almost finished. Please keep in mind that there are open positions on the CBH/SAA Board of Directors. We have an open position for the 2nd VP of Indoor. This is a pretty straight forward position that is in charge of running our State Indoor Archery championship. This is a multi-site tournament and scores come from a variety of venues, overall it's a fun job. You will enjoy free CBH dues for your efforts and can do most of the work from your home. Visiting the various shops is not required but is certainly encouraged where practicable. The Indoor position is open and will be up for re-election in 2024/2025. I will be appointing someone until then at which time that individual can decide to run again or not. Cont. on page 11

**President's Message** Continued from page 6-We are also losing our 2nd VP of Hunting, Rodney York. Rodney has done a great job over the last two terms. He has gotten the Big Game Club back on track. It's time for him to retire and enjoy some family time, and he will be sorely missed. We are currently accepting suggestions and applications for these positions. The Hunting position will be up for election this fall, with the right person taking office for two years, beginning in March of 2024. Applications and nominations for 2nd VP Hunting are due by October the 1st of, 2023.

In closing, I would say it has been a busy time and it just gets busier going forward. Good luck to everyone in the upcoming tournaments! Shoot straight and be safe!

## Wing Shooting and More

Small Game Chairman: J-Barr

As a little boy, I remember wing shooting with Dad and Uncle Ray. I was almost nine years-of -age when I got my hunting license. One week before my 9th birthday, Dad bought me my first shotgun. It was a single-shot Remington 20GA FULL choke. It had a brake breach with a hammer. At my age both were hard to operate let alone holding it up to shoot and hit something that was flying I(LOL). But, some how I did, that season I was able to harvest my first dove on September 1st, then duck and quail after that year, the rest was history.

As a young hunter, I was taught many things: respect for handling a firearm; respect for other hunters; respect for private property; respect for the law / Game Wardens and their purpose; respect for the animals you harvest; and the ability to clean and cook that harvest and share amongst family and friends. Most of all, the respect of all living animals, their surroundings, and critters in their surroundings. You begin to see wildlife and the outdoors from a much different and humbling perspective. With that, you develop a desire to want to protect and preserve what you experience for generations that follow.

At a much later time, I was introduced to archery by a neighbor down the street from me. He took me on one of his deer hunts, and that opened my eyes to a whole different perspective of getting close and upfront to this environment. I borrowed a friend's bow the following year and started practicing and doing good. I needed to learn the art of archery and

not just be good like with a firearm, but with much more to consider. Wanting to perfect what I had learned, I decided to go to a bow shop and get professional help (LOL). It was there I met Jim at Willow Creek Archery. He sold me my fist bow, and the rest is still to be written, as every day I pick up my bow.

PHOTO BY RAINER ECK

Wing shooting was my first love, and the timing in my young bow carrier made me think HUM I wonder if I can legally wing shoot with my bow, and if I can, then when and where, and what are the dates that I can harvest? Well, that opened Pandora's box, and I started asking veteran bow hunters, and game wardens for information. After lots and lots of conversations and research on the DFG / DFW website, the correct answers started to unfold.

Understand that the information I give below can change at any time and it is YOUR RESPONSIBILITY to know the species you are hunting, the hunt dates, and what equipment you can use legally as you harvest any wing and/or huntable species. For example, you must use a "FLU FLU arrow to harvest any migratory species. Below are some of the species and some of the estimated dates you can harvest some wing species you may want to harvest.

Eurasian Dove and Starling are – ALL YEAR. QUAIL, Chuka, Sooty / (Blue) Ruffed Grouse, August 19-September 8. Dove during the regular season. White – Tailed Ptarmigan September 9 – 17. Pheasant October 14 – November 5. Band- tailed Pigeon Northern California September 16-24. American Crow December 2nd – April 3rd.. Band- tailed Pigeon Southern California December 16-24. Pheasant – December 25 – January 21. Wild Turkey March 30 – May 19, 2024. Remember to ALWAYS check the DFW regulations for dates, times, harvest limits, boundaries and what equipment is legal to use the method of take.

## A Knapping Experience by George Peich

In the late 1970s, I developed a desire to create my own hunting equipment. However, I first needed to become proficient in using the bow and arrow and aiming accurately. In 1979, my friend Dave Hutson, who was interested in archery, and I joined the Oranco Bowmen in South Chino. Despite my preference for traditional shooting, I purchased my first compound bow called "High Country." It was during this time that I met Pete Whitworth, an experienced archer who used his father's handmade bows. Pete had been the Vice President of the club for many years.

At that time, I was working at a sign shop called Sign City, which was owned and operated by Pete and his wife Sue. They were known for their hand-painted signs found on nearly every Getty truck's rear window in Southern California. It was at the sign shop where I first encountered knapping. One of the club members, Brian (whose last name I can't recall), visited the shop to teach Pete the art of flint knapping. I watched with fascination like a kid at Christmas as Brian demonstrated the process of shaping flint, chert, obsidian, or other conchoidal fracturing stones to create stone tools. He used a long Ishi Stick with a "T" handle to apply maximum pressure and support it under the arm.

Back then, we didn't have the internet to learn about these techniques. I managed to make a couple of tools using copper from leftover signs.

Since I didn't have any suitable rocks or stresses, I used obsidian and new glass, which had similar properties. Most of my early work was done with glass, but I struggled to achieve thin pieces. Over the years, I intermittently pursued knapping, keeping some rough pieces for myself and giving others away. Getting a smartphone around 2000 greatly helped my progress by providing access to new information.

When the Covid pandemic hit and people began revisiting their bucket lists, I realized that knapping was something I wanted to explore again. But this time, the internet provided me assistance, and it was through online interactions that I met individuals who introduced me to the art of "Flint Knapping."

**Knapping** continued from page 16 This technique went beyond "Pressure Knapping," which I was previously familiar with. With flint knapping, one uses direct percussion by striking the stone with a harder stone or antlers, a method referred to as "ABO." The Paleo Period knapping, or "Indirect Percussion," allows for more precise hits. By pressing the Ishii stick or antlers against the stone, a platform is created that indicates where the break will occur. A clean break is achieved through well-placed strikes and constant pressure. If the break is not clean, it is referred to as a hinge, shelf, or island. Years of practice on various rocks will eventually teach you to work with the stone's inherent qualities —it becomes what it wants to be.

people of those areas utilize the available resources. They developed their own unique styles and techniques for knapping within their tribes.

Today, the internet showcases remarkable contemporary knapping work. Some individuals continue this craft for survival purposes, while others, like myself, use it alongside modern equipment. The abilities of people have evolved, and new technology has leveled the playing field. Personally, I appreciate the traditional methods but also recognize the value of progress. It's essential not to forget our past.

For the past couple of years, I have been actively involved in knapping at our club. I am grateful to many people who have supported me along the way. I extend my thanks to all of them. Recently, I had the privilege of creating knapping awards for our club league at Oranco Bowmen.

One of our members showed the awards to Rodney York, which led to a brief conversation and an opportunity for me to make awards for the State Broadhead shoot in May 2023 at Lodi Bowmen. I feel honored to be part of this event. Although I am not a competitive archer, my love lies in the simple act of shooting.

Knapping was a vital survival skill for ancient people, and we engage in it for enjoyment and to connect with our ancestors. Each stone we use comes from a specific location, and the indigenous

The archery community is widespread, with numerous clubs and members, and knapping is a cherished aspect that accompanies it. I am proud to have been asked to share my story, and I want to express my gratitude to David Bacon for transcribing this article. Cheers to all, and remember to appreciate the past, consider the future, but most importantly, live in the present.

How Stone Age Humans Made Hand Axes

# The 27th Annual Tilapia Shoot

## Jbarr

The 27th Annual Tilapia Shoot on April 29-30th was another fun-in-the-sun adventure. Most of the participants were able to harvest tilapia, carp, and a few bullfrogs for the first time.

Congratulations to everyone who took the time to come out and have fun in the sun with us Small Game critter killers.

Congratulations to our big winners! 1st place tilapia Jack Roney with his 4lbs. 0oz., 2nd place tilapia Jack Roney 3lbs. 5oz. and 3rd place tilapia Dylan Roney 2lbs. 13oz. for the carp 1st place carp 14lbs .4oz. Jake Ashbaugh, 2nd place 10lbs. 7oz. Jake Ashbaugh and 3rd place 8lbs. 0oz. Jack Roney.

JAKE, DYLAN AND JACK

JACK RONEY

Kat was able to harvest her first carp under the guidance of Scott Dayton, photo right top] and she had so much fun, she signed for CBH/SAA on the spot!

Another first harvest was Karen Keating and Raylene Proto; [Shown right] each harvesting their first bullfrog with the help of Brad Grap and Wayne Raupe.

Speaking of Wayne Raupe, if you didn't see the article in the June 2023 issue of the CBH/SAA newsletter you must read how he harvested [more of a Catch and Release] a desert burro from a muddy situation at the shoot with Karen Keating's help! Continued on page 15

**Tilapia** Continued from Page 14-

DYLAN RONEY

Remember to take an active role in supporting our love of archery by attending, joining, shooting participating in any club, banquet, shoot, or conservation nonprofit like Rocky Mountain Elk Club, CBH-SAA, CWA, Pope & Young. Going to your local bow shop and supporting them is essential to sustaining the sport of archery. No matter what it is, always remember FINS, FEATHERS, FUR, and FUN.

**VENISON RAGU (**  
**VENISON SPAGHETTI SAUCE)**  
 Courtesy of Mike Cleavenger  
[TheFrizzledLeek.com](http://TheFrizzledLeek.com)

This **Venison Ragù** recipe is perfect for weeknight dinners served over top of spaghetti squash. It's Whole30-approved, dairy-free, gluten-free, and Paleo friendly  
 (Add the Caprese Salad on page 18)

**Ingredients:**

1 large spaghetti squash  
 1 tablespoon olive oil  
 4 slices Whole30 bacon chopped  
 1 yellow onion diced  
 1 large carrot peeled and finely diced  
 2 large stalk celery finely diced  
 1 tablespoon garlic minced  
 1 pound ground venison  
 2 bay leaves dried  
 ½ teaspoon dried thyme  
 ½ teaspoon dried oregano  
 ½ teaspoon ground cinnamon  
 ½ teaspoon ground nutmeg  
 2 tablespoons tomato paste  
 2 cups marinara sauce sugar-free  
 1 cup beef bone broth  
 ¼ cup coconut milk  
 3 tablespoons fresh parsley chopped  
 salt and pepper too taste

**Spaghetti Squash**

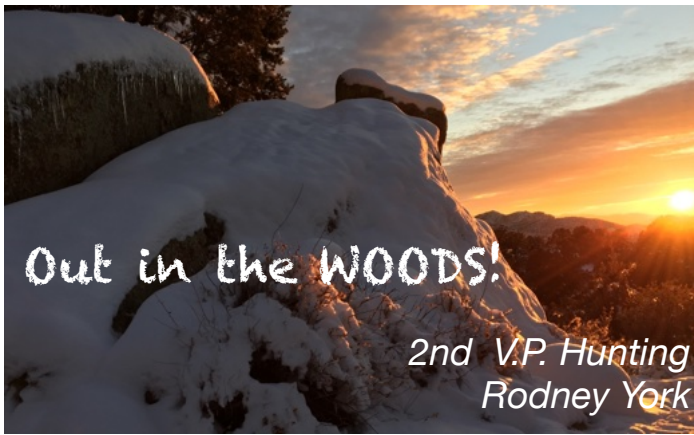

- Preheat your oven to 400°F and line your baking tray with parchment paper. Cut the squash in half crosswise to get longer spaghetti squash noodles. Scoop out the seeds, brush with avocado oil, and season with salt and pepper.
- Place squash face down on the baking tray and cook for 30 minutes, depending on the size of the squash.

**Ragu Sauce**

- While the squash roasts, heat olive oil up in your dutch oven over medium-high heat. Add the bacon and cook, stirring, until browned and fat is rendered, 4 to 5 minutes. Add the onions, carrots, celery, and garlic and cook until soft, 4 to 5 minutes.
- Add ground venison, and cook, stirring, until no longer pink, about 5 minutes. Add in bay leaves, thyme, oregano, cinnamon, nutmeg, salt and pepper. Cook for 1 minute to toast the spices. Add the tomato paste and cook for another 1-2 minutes.
- Pour in beef broth, marinara sauce, and coconut milk. Bring to a boil while stirring occasionally, then lower the heat and simmer for 10 minutes to thicken the sauce.
- Discard the bay leaves and season with salt and pepper too taste.
- Use a fork to scrape the spaghetti strands from the squash and place in a serving bowl. Serve topped with Ragù sauce and garnish with fresh chopped parsley.

## -Preparation -

Living in the mountains since birth lends itself to becoming knowledgeable of the importance of planning ahead. Many of us fall into the category of natural procrastination. This writer by nature fits that description. Thus, more work must be done to overcome habitual tardiness. Because of this when one's only heat source is wood they must start composing a wood pile early on in the year.

The Sierra snows of 2023 provided excessive opportunity to harvest downed timber for processing. In earlier years at 3,000 elevation 15 to 17 cords of wood were required to heat a 2,000 square foot house. Today with EPA required standards the same house can get by on less than 3 cords. New energy compliment certified stoves for the State of California are restricted to no more than 4.5 grams per hour particles of emissions.

Look for the EPA certification label on the back of the stove, or [check the current list of EPA-certified wood stoves](#).

A new tax credit began in January 2021 and runs through the end of December 2023. Specifically stoves must burn biomass fuel such as wood pellets, wood chips or cord wood. They must run at 75% efficiency heating value or higher and meet the EPA standards. The tax credit is applied towards the total purchase and installation costs of your new or upgraded home heating system on your tax form.

The latest updated version states a 30% tax credit with no lifetime limit – capped at \$2,000 annually – based on the full cost (purchase and installation) of the unit. This version will last through December 2032. The new tax credit under Sec. 25(C) of the U.S. Internal Revenue Code (IRC) is in effect on January 1, 2023 for qualifying purchases and installations completed on or after that date, through December 31, 2032.

<https://usfireplacestore.com/blogs/articles/new-wood-stove-tax-credit>

\*\*\*

Back to the idea of planning ahead. Now that July has rolled around your procrastination must stop. Bow season for deer has arrived! If you haven't spent the last few months "tuning" your equipment you better "pick it up." Here is the quickest and most effective method this author has utilized.

First, let's focus on a lighter weight setup than the usual hunter might use. Primary uses for these setups might be for quail, rabbits, squirrels, and perhaps turkey or coyotes. The side benefit could be shooting tournaments with lower weight bows while still practicing with higher levels of F.O.C and roughly the same arrow trajectory. What a benefit to the shoulders of young and older shooters to boot. Let's say you want to drop from your #55 pound recurve down to #40 longbow.

Continued on page 9

**Prepared from page 8** - What a benefit to the shoulders of young and older shooters to boot.

Let's say you want to drop from your #55 pound recurve down to #40 longbow. Instead of 400 grains up front in a 350 spine weight shaft you wisely choose to experiment with a 600 spine 3D<sub>HV</sub>. (This *Victory* shaft is virtually the same as a *RIP XV* but listed with "target" in 600 spine arrows).

Next step is the decision of what weight you want up front. Here the writer chose standard outserts of 21.2 grains fitted with 125 grain field tips.

Next a shortened; cut to length wrap is rolled on the shaft - or no wrap at all. Bare shafts are fired at roughly 10 feet with length cut off to stiffen the shaft until it cuts paper with no tear hole deviating from a vertical line.

Once this is accomplished feathers are added. In our example we will use four 3" feathers rather than our usual 2".

This will add not only more mass weight but increase the spine a touch. This will add not only

**Have a special story?**

Maybe a family tradition? A funny story? A special accomplishment? Useful information?

Contact: Lori Raupe, CBH Editor,  
For help with your story.

**The deadline for the August Newsletter  
is  
June 25th!**

More mass weight but increase the spine a touch. Four 3" feathers, each weighing roughly 2.7 grains will yield approximately 10 grains. Conversely, the same number of 2" feathers are 1.4 grains each and total around 5.6 grains respectively.

Now our total arrow build of 320 grains in a 28" length arrow balances at 20" and trims out in an equivalent to 21.43% F.O.C.

To further mess with your mind we could introduce the factor of nocks and their effect on the arrow spine. All nocks are NOT created equal! Manufactured weights vary immensely, plus black nocks will always weigh in heavier (more dye needed). To simplify this issue a little, let's say the lightest nocks you have are 6.8 grains each.

Continued on page 10

**Prepared from page 9** - On the other hand the heaviest nock setup using brass with push in nocks weighs a total of 12.2 grains. These heavier nock setups are what you used to create your bare shaft tune.

However, after adding the 4) 3" feathers your "tuned arrow" now proves too stiff. Using the 6.8 grain nocks not only reduces the overall arrow weight but because its' trimmed weight reduced in the rear of the shaft it weakened the spine.

The result therefore moves the arrow impact back to zero deviation from the exact vertical center. Once again, perfect arrow flight with the maximum penetrating ability has been achieved with this combination.

Using more or less the same approach your finished *RIP XV 500* arrow may now produce a total weight of 370 grains. This is assuming you have cut the length down to 29 3/4" after affixing the same 21 grain outsert with 175 grain field point. If you didn't use a wrap at all and shot 4) 2 inch feathers with the lightest weight nocks you will have achieved an FOC of 25.63%. In simplest terms, this higher FOC product was enabled due to a shaft with roughly 5 grains per inch, less weight on the rear end and more weight up front. Talk about a hard hitting, quiet, fast arrow with extremely low wind drift and the utmost accuracy; this baby has it all!

See you in the woods -  
 Hunt High...and Hunt Hard

Who said shooting "stikbows" was simple? - As with any archery you can take it to the level of perfection you desire! Moreover, you now desire a combination for you 45# longbow.

**Caprese Salad (with Avocado)**  
 (Also known as Italian Flag Salad.)

- 1 1/2 c 1/4" Cherry tomatoes
  - 1/2 Avocado diced
  - 1 TBSP (heaping) pesto
  - 5 Mozzarella half/balls
- Stir and serve.  
 A delightfully refreshing summer time salad.  
 Each serving is individually prepared.  
 (optional) Basaltic Vinegar topping

Bona petite!

## 2023 Big Game Club

### 10K Drawing Winners Announced

Congratulations to the newest winner in the annual CBH Big Game Club \$10K Drawing. Rick Vega of Fountain Valley had the lucky ticket to win this year's \$10,000.00 prize. 180 tickets were sold this year, but the BGC made the decision to award the large prize anyway, and Rick is glad that they did. The last three tickets in the barrel belonged to Lalida and Craig Fritz, Rodger Cady and Wayne Raupe, and Vega. The Fritz ticket was pulled out and won NOTHING! The Cady/Raupe ticket was pulled next and won the \$500.00 runner-up prize, and the last ticket was Vega's lucky stub. The ticket was sold by Vince DiMiceli who also won himself a prize for that feat. Karen Keating won the ticket seller's drawing.

The \$10K Drawing is unique in that every single ticket is drawn out of the barrel with the first ticket winning \$100.00, then the 10<sup>th</sup>, 20<sup>th</sup>, 30<sup>th</sup>, etc. each winning \$100.00. Next to last and the last tickets win big prizes, then all the non-winning tickets are placed back in the barrel for a chance at three \$250.00 Last Chance prizes. This year's drawing marks about 35 straight years of hosting this drawing which was modeled after a suggestion by long time CBH member, Rocky Chisholm. Thank you to everyone that supports the Big Game Club by selling and/or buying tickets every year.

Special thanks this year to Karen Keating who had many tickets in the barrel that were all drawn too early to the delight of everyone present at the live drawing. Karen had to endure the playful ribbing by the announcer as each ticket was carefully pointed out as belonging to Karen...again...and again...and again!!! Hoping you all can get in next year's drawing where you too can join the famous list of past winners!

# CBH/SAA STATE TARGET CHAMPIONSHIPS

## SEPTEMBER 2023

### "900 ROUND"

**Champion in each style will receive belt buckles**  
 NFAA or USA Archery with CBH/SAA membership required for awards.

\*Online registrants only will receive 1.75 oz mini Rootbeer Float glass & eligible for gift card raffle.

Shot from longest distance to shortest

Ties will be broken by Xs, if still tied by arrows scored.

Styles will be flighted individually based on number of participants in each style.

#### SHOOT FEES

Young Adult, Youth, Cub (17 and under)	\$20
Adult and older (18 and older)	\$40

**Thank You for your Donations to the CBHSAA Legislative Defense Fund!  
By Amanda Duchardt - Legislative Coordinator**

The CBH/SAA Legislative Team would like to extend our wholehearted thanks all those that donated to the Legislative Defense Fund. It is our goal to promote wildlife conservation and protect our archery and hunting heritage within the state political system. With your donations, the CBH/SAA Legislative Team can attend important meetings and react to issues that are impacting our sport. We can also meet our financial obligations to Gaines and Associates, who represent us in the state capital and FGC meetings throughout the State. Additionally, it is our responsibility to cover expenses such as when we need to retain a legal team to protect us and our sport. This is why your donations, in any amount, are so important. Again, we thank those listed below in addition to those that donated previously for their support!

**This Month's Donations Include:**

**Sean Richards \$20, Gilbert Olivas \$50, multiple State Broadhead participants \$80,  
Amanda Duchardt \$50**

**THANK YOU**
